Mtn Bike Site – The Mountain Spoke

Author: Robert Nebeker

Site Purpose: For guided tours for a mountain bike adventure. This is to excite and get business for people wanting to join on a tour.

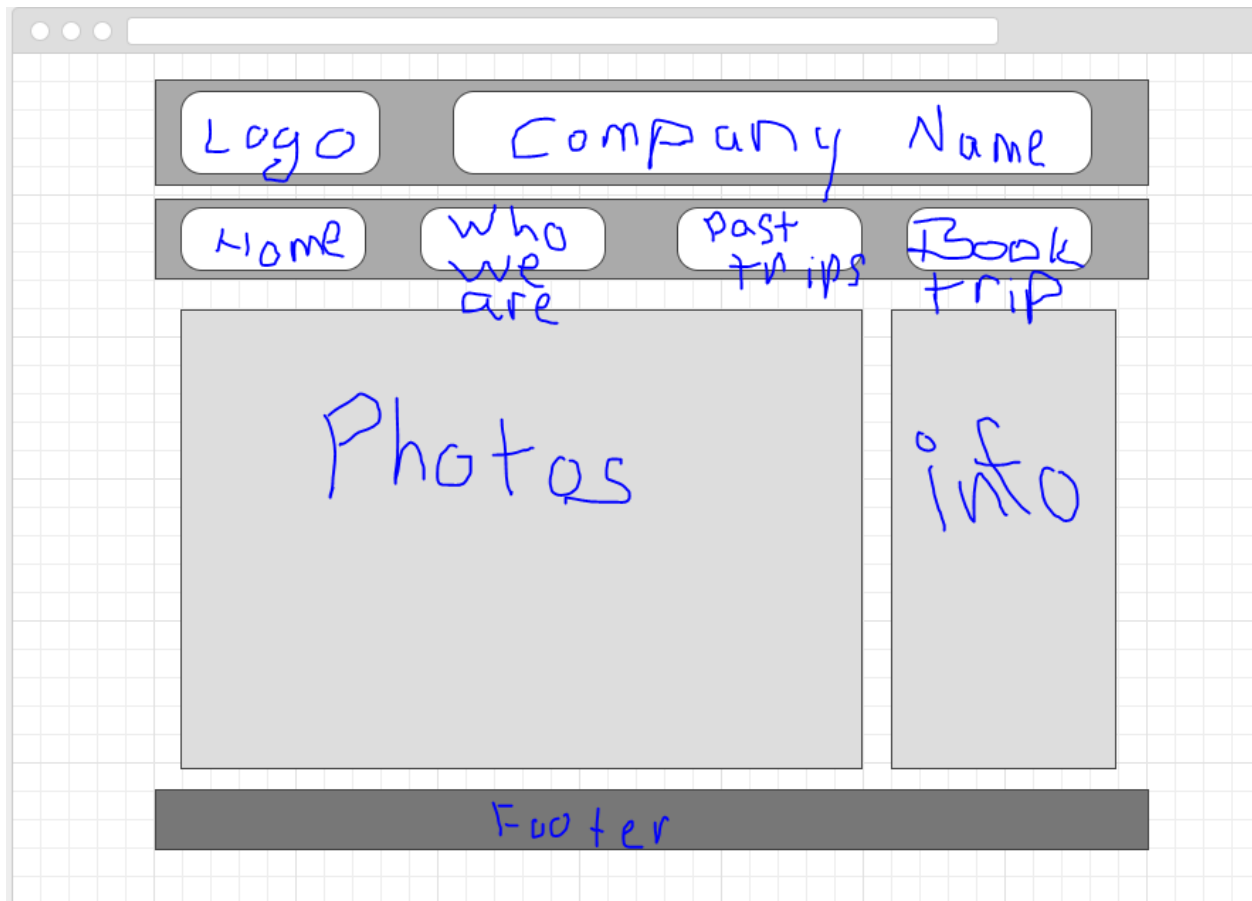

Target Audience: Mtn Bikers and outdoor enthusiasts. Targeting groups rather than individuals.

Site Map: Main site with MTN Bike info about the guides and adventures. Include Purpose of the company and objective. Navigation bar with areas to visit that give more info, previous trips, reservations, and additional info about the company.

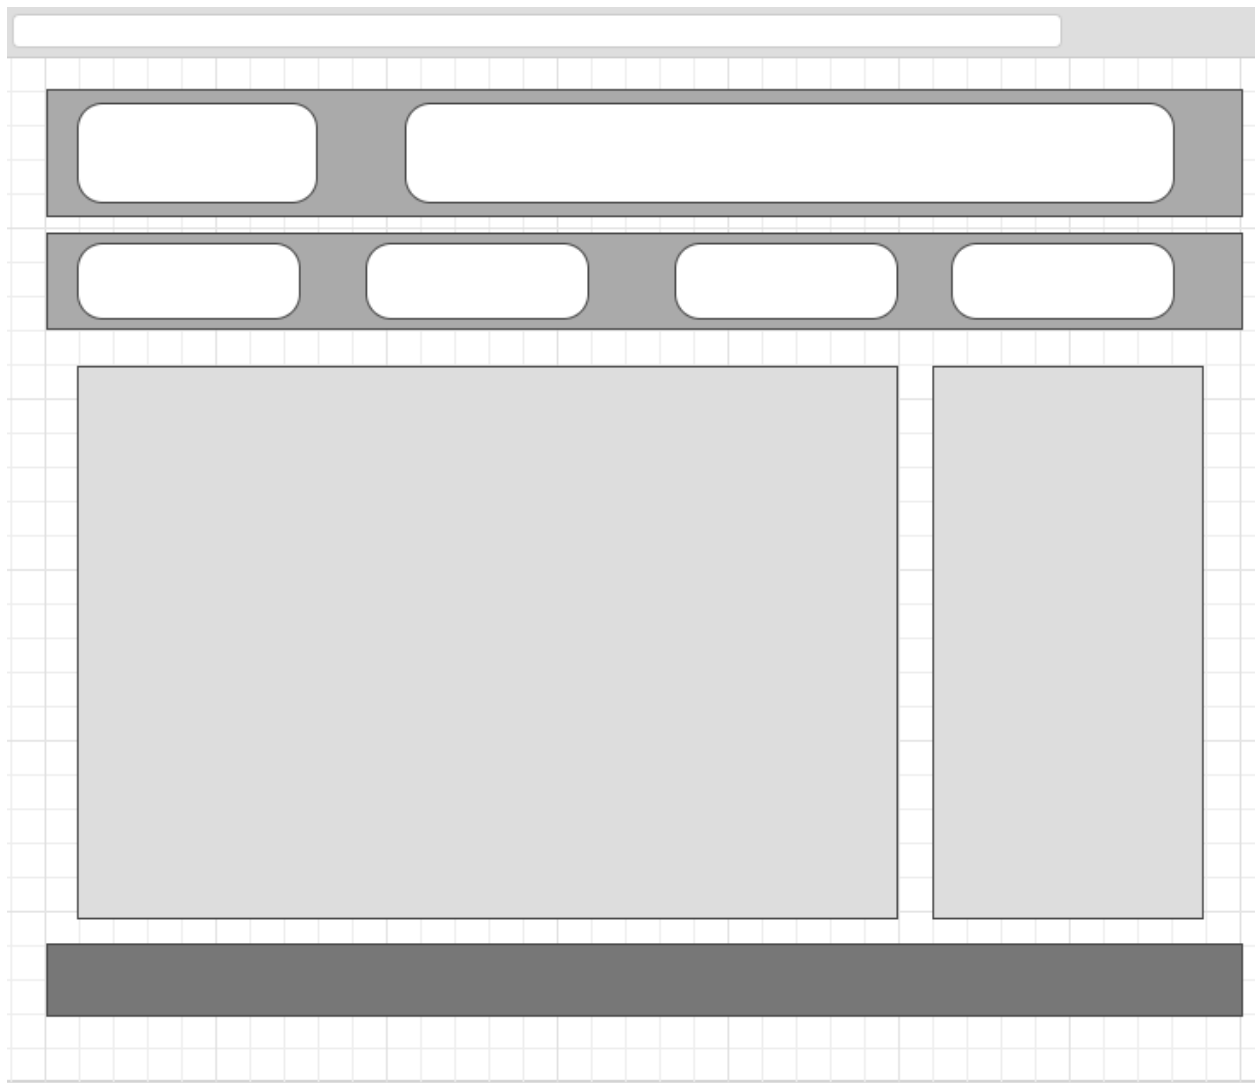

Color Scheme: Looking for a more outdoorsy feel. Something along the lines of a Brown and green with white to contrast them.

Typography will be using Google open source fonts. I'm planning on using green and brown. But subject to change with orange and black/gray. Still deciding, but will definitely change the colors if it looks bad.
